Modules / Tools for Classroom Management

Tools with the Chrome icon indicate they work on both Windows and Chromebooks.

Block Sound: Mute the volume of the remote machine (this will only mute the sound of the open tabs on a Chromebook not the whole device).

Block Web: Disables the ability to utilize browsers on the selected device(s).

Broadcast Screen: Allows a user to choose a device and broadcast that screen across to other devices listed in the console.

Close Tab: Close the currently active browser tab (Chrome only).

Control: Select and remote control devices.

End Session: Log off, Restart, or Shutdown one or multiple devices.

Launch App / Website: Automatically open websites in any browser or open installed applications on one or more computers.

Live Chat: Live to chat to one or multiple remote users.

Lock Screen: Locks a device so that it can't be operated by a user.

Log On: Allows you to remotely log onto one or more machines using the credentials you provide.

Quick Question: Ask one or many users a question with up to four answer choices. Responses are displayed below options window.

Send Message: Send a static message to one or many remote users.

Send File / Document: Upload and send files to one or multiple users.
